Your Vision, Our Future

Associate Endoscope Technician Location: Bartlett, TN

Let's inspire healthier lives, together.

Job Description

The Associate Endoscope Technician will evaluate, troubleshoot, disassemble, assemble, repair, and/or inspect Endoscopes to assure proper function. The incumbent will use a variety of small hand tools and test equipment to make repairs and facilitate disassembly and reassembly. He/She will complete and maintain accurate service records both electronically and manually. The incumbent will ensure that safe work practices are employed by observing guidelines established or enforced by Olympus. He/She may be assigned to support business needs by working in other areas outside their primary responsibility. The incumbent will proactively participate in the quality systems, quality improvement, and "5S" programs as directed by the Production Supervisor. He/She will maintain confidentiality of documents and processes.

Job Duties

In a typical day, you will:

- * Acquire job skills and learn company policies and procedures to complete routine tasks.
- * Perform functions related to the repair and service of endoscopes following the successful completion of technical training and completion of an initial skill set.
- * Reach and maintain acceptable levels of productivity and quality, requisite with the amount of time in job.
- * Participate in technical training in order to become proficient at one stage within the assigned Department.
- * Work on assignments that are routine in nature, requiring limited judgment.
- * Make decisions related to repairs.
- * Receive detailed instructions on all work; Work under close supervision.
- * Perform other related duties as assigned.

REQUIRED QUALIFICATIONS:

- * A minimum of 6 months to 1 year of electro-mechanical experience and/or demonstrated repair ability is required.
- * Must have sufficient manual dexterity with small hand tools such as screwdrivers, electric screwdrivers, pliers, and tweezers.
- * Must have the experience or ability to work with microscopes, test equipment (such as light sources, video processors, mega ohm testers), and hand soldering, where applicable.
- * Must have good communication skills (both verbal and written).
- * Must have the ability to read and follow manuals, work instructions, job standards, and related information.
- * Must possess basic computer skills (including keyboard and mouse skills).
- * Must be customer focused/oriented.

Your Vision, Our Future

Endoscope Technician I Location: Bartlett, TN

Let's inspire healthier lives, together.

Job Description

Every Endoscope Technician must understand and accept the responsibility to ensure the safety of all Olympus products that are repaired, by following established processes and procedures.

Under direction of the Production Supervisor, the Technician shall evaluate, troubleshoot, disassembly, assemble, repair and/or inspect Endoscopes to assure proper function. Uses a variety of small hand tools and test equipment to make repairs and facilitate disassembly and reassembly. Completes and maintains accurate service records both electronically and manually. Ensures that safe work practices are employed by observing guidelines established or enforced by Olympus. May be assigned to support business needs by working in other areas outside their primary responsibility. Proactively participates in the quality systems, quality improvement and "5S" programs as directed by the Production Supervisor. Maintains confidentiality of documents and processes.

The Technician must accomplish these objectives while maintaining a clean, well-organized work environment. The Technician will be expected to maintain acceptable standards for attendance and punctuality, and as a condition of employment, work overtime as needed.

All Technicians must have sufficient manual dexterity with small hand tools (such as screwdrivers, electric screwdrivers, pliers, tweezers); experience or ability to work with microscopes, test equipment (such as light sources, video processors, mega ohm testers) and hand soldering, where applicable; good communication skills (both verbal and written); the ability to read and follow manuals, work instructions, job standards and related information; possess basic computer skills (including keyboard and mouse skills); and must be customer focused/oriented.

Job Duties

In a typical day, you will:

- * Demonstrates the ability to maintain acceptable levels of quality and productivity as acquired thru technical training and demonstrated aptitude within a designated skill set.
- * Works on assignments that are semi-routine in nature.
- * Normally follows established procedures on routine work; requires instructions only on new assignments.
- * Performs all other related duties as assigned.

Job Requirements

REQUIRED QUALIFICATIONS:

- * High school diploma preferred or equivalent working knowledge and responsibilities.
- * Requires a minimum of one-year experience at the Associate Endoscope Technician level or equivalent experience repairing medical devices.
