

**Kyla Gailes is a very talented and unique student. "Taking the YOU-Turn" is her first book and won't be her last. She is very funny, athletic and musically talented. She loves basketball and used to swim competitively. Writing this book was just the cherry on top to what she's done so far. She is a very intelligent student and gets her work done...eventually. Currently, as of December 2023, she is on a basketball team and loves it there. She has all A's one B and is an excellent scholar at her school. Most of the time she stays to herself but when it's time to play basketball, she's a fun and loving person.**

**Sariyah is a young girl that doesn't make any friends. She's mostly sad all the time because of this position she's in. She was a straight A student and minded her own business most of the time at the school she attended. One thing about Sariyah is she always had an attitude on her back. One day she found out that she was switching schools. She was very disappointed because she was just getting used to the school she was attending. While attending the new school, she went through plenty of adventures. Was this school going to be any better? Will she be able to make it through this school year?**
