

The Light Inerrant

By Bruce Meisterman

All light has disappeared, plunging the world into total darkness. No light can be seen, no stars and no sun, no electrical light, no reflections, nothing. As suddenly as light vanished, it returned. But it then starts disappearing with an alarming frequency creating growing unrest.

Humankind has always held a fear of the dark and now with good reason. Without light, crops can't grow. People can't see where they are and where they're going. Protests and riots start breaking out around the planet as the search for an answer to light's behavior dominates everything. Amid concerns from the government, media, televangelists, and science, some would seek to capitalize on this phenomenon for their gain.

It will take Adam Faraday and his research team at Aura/Sonos to determine what is happening, and what he discovers is light is becoming sentient and that's only the beginning.

BRUCE MEISTERMAN

The Light Inerrant is the latest book by Bruce Meisterman. A science/speculative fiction novel, it portrays the world being subjected to recurring periods of darkness while addressing the divides within our cultures, and how some elements of society would take advantage of light's disappearance for their own gain. What they learn is far more powerful than anyone could have imagined.

His previous books include the fictional tale of Jacob Will in *A Coward's Guide to Living* and *Arn? Narn.*, a photo-documentary about vanishing rural life in Newfoundland. Bruce has also contributed to other books such as *Tennessee 24/7*, *Giving Back*, and *Gateway to Aero-Science*.

A Coward's Guide to Living is Bruce's first book of fiction. Several incidents in that book are grounded on actual events and while the characters are fictional, some are based on individuals he's known.

His book, *Arn? Narn.* was named the English magazine Fishing Book Reviews Book of the Month. He was also a featured author at the Southern Festival of Books and a two-time Killer Nashville Writers Conference panelist.
